

BI 156 : Anatomy & Physiology I

The first of a two-course sequence, this course provides a lecture and laboratory study of the structure and function of human cells, tissues, and organs and body systems as they relate to human health and biology. The course stresses homeostatic control systems and coordinated body functions with an emphasis on the integumentary, skeletal, muscular, nervous, and endocrine systems.

Discipline NS, CR, GE

Credits 4

Theory Hours 3

Lab Hours 1

Prerequisites

None.
