

# DMS 312 : Abdominal Sonography II

This course will focus on anatomy, physiology, pathology, and pathophysiology seen on normal and abnormal sonograms. Upon completion, students should be able to recognize abnormal pathological processes in the adrenal, urinary system, renal transplants, gastrointestinal tract, spleen, retroperitoneum, and previously taught Abdominal Sonography I content.

**Credits** 3

**Prerequisites**

All previously required and concurrent courses per the academic plan or with consent of the faculty.
