

DMS 302 : Ancillary Imaging and Cross-Sectional Anatomy

This course will introduce the student to the various imaging modalities within a contemporary healthcare setting. Students will gain an understanding of the patient's pathway from diagnosis to treatment. Various allied health specialties such as cardiac catheterization, CT, MRI, radionuclide imaging, sonography, women's imaging, radiology, and radiation oncology will be discussed. Cross-sectional anatomy will be covered as it relates to a patient's diagnosis.

Credits 2

Prerequisites

All previously required and concurrent courses per the academic plan or with consent of the faculty.
